

VAI61..

VBI61..

ACVATIX™

**2-port and 3-port ball valves  
PN40**

with internally threaded connections

**VAI61..  
VBI61..**

- Brass UNS C35330 (DZR) ball valve body
- DN 15...50
- $k_{vs}$  1...63 m<sup>3</sup>/h
- Internally threaded connections Rp.. as per ISO 7-1
- Angle of rotation 90°
- For use with rotary actuators GQD..9A, GMA..9E with spring-return and GDB..9E, GLB..9E without spring return

**Use**

For use in heating, ventilating and air conditioning plants as a control or safety shutoff valve.

For closed circuits (avoid cavitation, see page 5).

## Type summary

Type 2-port	3-port	DN	$k_{vs}$ [m <sup>3</sup> /h]	$S_v$
VAI61.15-1	-	15	1.0	> 500
VAI61.15-1.6	VBI61.15-1.6		1.6	
VAI61.15-2.5	VBI61.15-2.5		2.5	
VAI61.15-4	VBI61.15-4		4.0	
VAI61.15-6.3	VBI61.15-6.3		6.3	
VAI61.15-10	-		10

VAI61.50-63	-		63	

DN = nominal size

$k_{vs}$  = nominal flow rate of cold water (5...30 °C) through the fully open ball valve at a differential pressure of 100 kPa (1 bar)

$S_v$  = rangeability  $k_{vs} / k_{vr}$

$k_{vr}$  = smallest  $k_v$  value at which the flow characteristic tolerances can still be maintained at a differential pressure of 100 kPa (1 bar)

### Mounting sets

Type	Description
<b>ASK77.2</b>	Mounting set for rotary actuators GMA..1E with spring-return, for special types with switches or potentiometer
<b>ASK77.3</b>	Mounting set for rotary actuators GDB..1E and GLB..1E without spring-return, for special types with switches or potentiometer
<b>ASK77.4</b>	Mounting set for rotary actuators GQD..1A with spring-return, for special types with switches or potentiometer

### Ordering

Example:

When ordering please give type, stock number, description and quantity.

Type	Stock No.	Description	Quantity
VAI61.25-16	VAI61.25-16	Ball valve	2
GLB161.9E	GLB161.9E	Rotary actuator	2

### Delivery

Ball valves, rotary actuators and mounting sets are packed and delivered together.

### Spare parts, Rev. no.

See overview, page 10.

VBI61.50-40					240		240	

$\Delta p_{max}$  = maximum permissible differential pressure across ball valve's control path, valid for the entire actuating range of the motorized ball valve; for low noise operation, we recommend a maximum permissible differential pressure of 200 kPa

$\Delta p_s$  = maximum permissible differential pressure at which the motorized ball valve will close securely against the pressure (close off pressure)

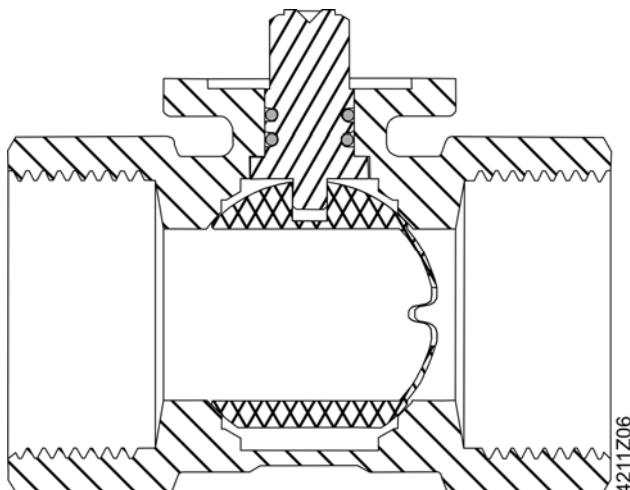

### Rotary actuator overview

Type / Stock no.	Actuator type	Operating voltage	Positioning signal	time	Spring return function	time	Data Sheet
GQD131.9A	Electro-motoric	AC/DC 24 V	3-position	30/15 s <sup>1)</sup>	Yes	15 s	N4659
GQD161.9A			DC 0...10 V				
GDB331.9E	Electro-motoric	AC 230 V	3-position	150 s			N4657

## Technical design

### Ball valve cross-section

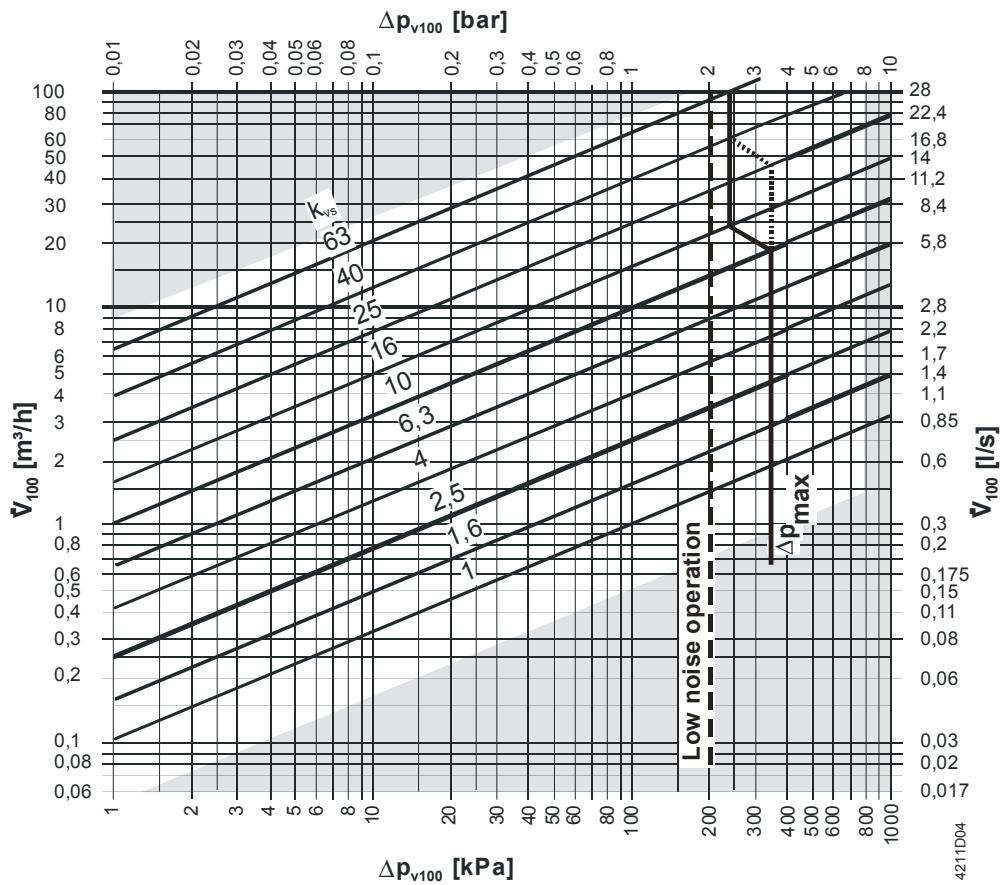

Ball with integrated control characteristic

Special PTFE seat ring design for low torque operation

## Sizing

### Flow diagram

-----  $\Delta p_{\max}$  for VAI61.. and VBI61.. see table equipment combinations for details

$\Delta p_{\max}$  = maximum permissible differential pressure across the ball valve, valid for the entire actuating range of the motorized ball valve; for low noise operation, we recommend a maximum permissible differential pressure of 200 kPa

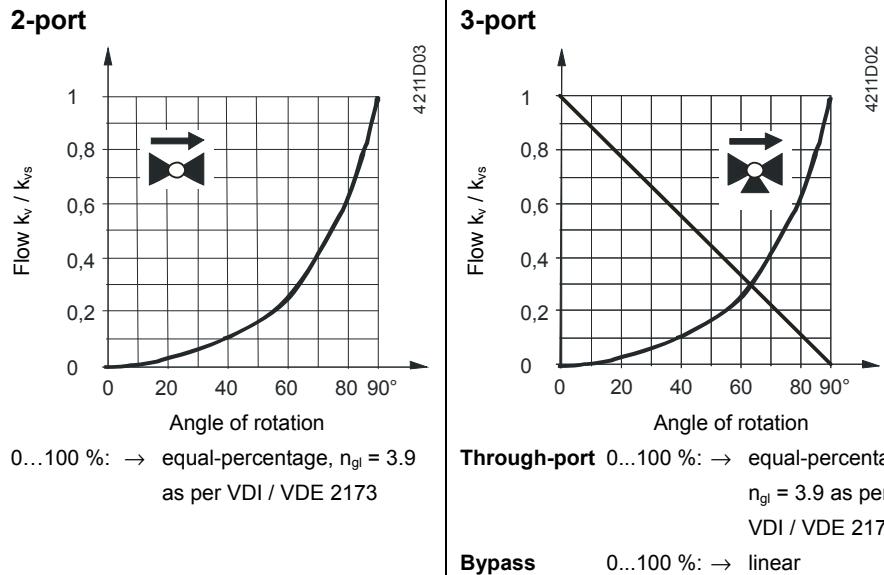

$\Delta p_{v100}$  = differential pressure across the fully open ball valve and the ball valve's control path at a volumetric flow  $\dot{V}_{100}$

$\dot{V}_{100}$  = volumetric flow through the fully open ball valve

100 kPa = 1 bar  $\approx$  10 mWC

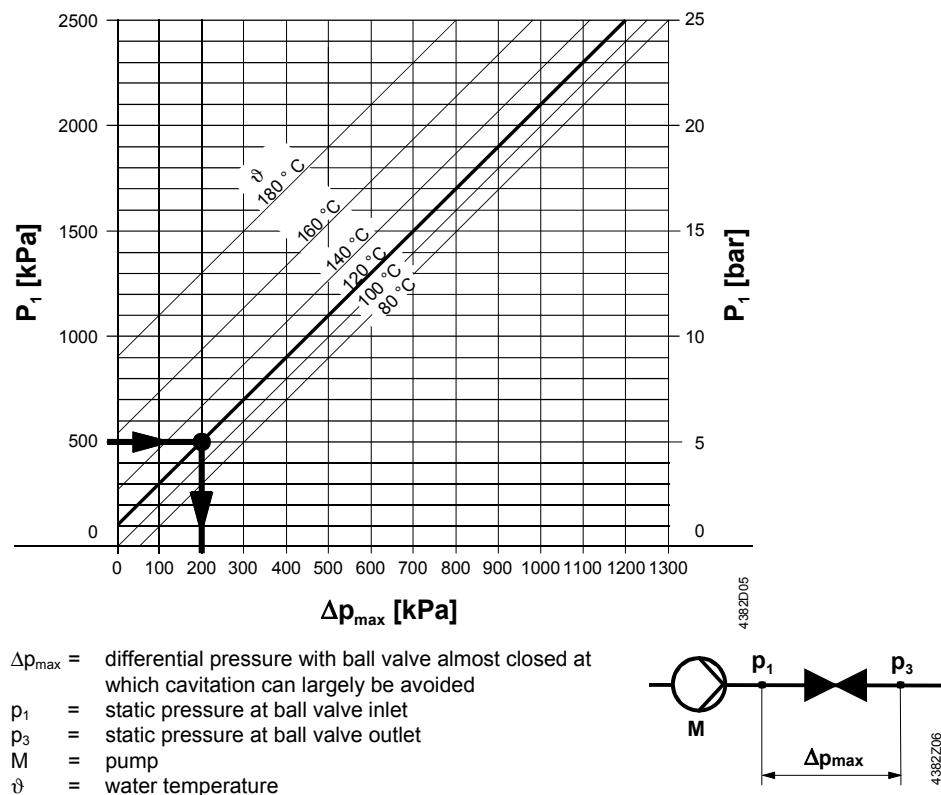

1 m<sup>3</sup>/h = 0.278 l/s water at 20 °C

## Ball valve flow characteristic

## Cavitation

Cavitation accelerates wear on the ball and seat, and also results in undesirable noise. Cavitation can be avoided by not exceeding the differential pressure shown in the flow diagram on page 4, and by adhering to the static pressures shown below.

High temperature hot water example:

Pressure  $p_1$  at ball valve inlet: 500 kPa (5 bar)  
Water temperature: 120 °C

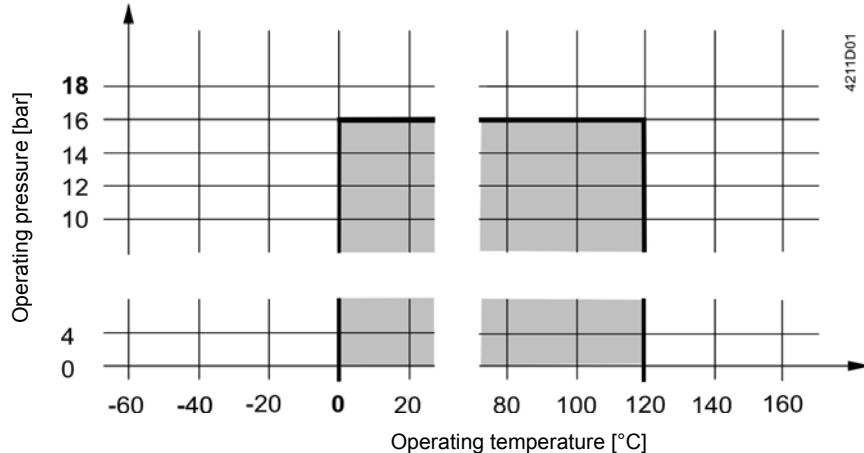

From the diagram above, it will be seen that with the ball valve almost closed, the maximum permissible differential pressure  $\Delta p_{max}$  is 200 kPa (2 bar).

Note on chilled water

To avoid cavitation in chilled water circuits, ensure sufficient counter-pressure at the ball valve's outlet, e.g. with an additional throttling ball valve downstream from ball valve. Select the maximum differential pressure across the ball valve according to the 80 °C curve in the flow diagram above.

## Operating pressure and temperature

Fluids

4211D01

## Operating pressure and medium temperature as per ISO 7005

Current local legislation must be observed!

## Notes

### Engineering

We recommend installation in the return pipe, as the temperatures in this pipe are lower for applications in heating systems, which extends the stem sealing gland's life.

Ensure cavitation-free flow (refer to page 5).

With closed and open circuits, always use a strainer upstream of the ball valve to increase the ball valve's functional safety.

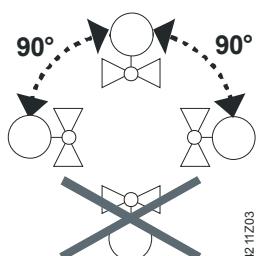

### Mounting

Ball valve and rotary actuator can easily be assembled on site. Neither special tools nor adjustments are required.

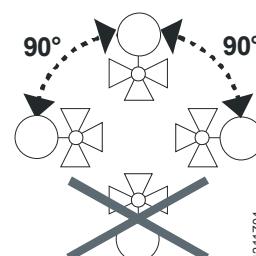

The ball valve is supplied with Mounting Instructions  
(VAI61.., VBI61..: 74 319 0647 0).

### Orientation

VAI61..

VBI61..

### Direction of flow

When mounting, pay attention to the ball valve's flow direction symbol ➔.

### Commissioning

**Commission the ball valve only if the rotary actuator has been mounted correctly.**

Ball valve stem moves counterclockwise: Ball valve opens = increasing flow  
Ball valve stem moves clockwise: Ball valve closes = decreasing flow

## Maintenance

---

VAI61.. and VBI61.. ball valves are maintenance-free.

### Warning

When doing service work on the ball valve / rotary actuator:

- Deactivate the pump and turn off the power supply
- Close the shutoff ball valves
- Fully reduce the pressure in the piping system and allow pipes to completely cool down

If necessary, disconnect the electrical wires.

Before putting the ball valve into operation again, make certain the rotary actuator is correctly fitted.

### Disposal

Before disposal, the ball valve must be dismantled and separated into its various constituent materials.

Legislation may demand special handling of certain components, or it may be sensible from an ecological point of view.

**Current local legislation must be observed.**

## Warranty

---

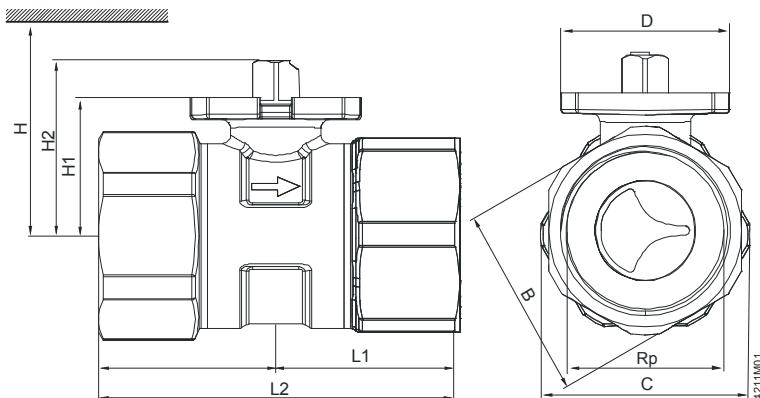

The technical data given for applications is valid only in conjunction with the Siemens rotary actuators listed under "Equipment combinations", page 3.

All terms of the warranty will be invalidated if rotary actuators of other manufacture are used.
